NodeJS / ExpressJS
MongoDB / MySQL

Mobile
Dart / Flutter
Java / Kotlin

Embedded Systems
C / C++
Linux
Arduino / Raspberry Pi

Data Science / Other
Python
Git

EDUCATION

B.E.Sc - Mechatronics Systems Engineering
2017-2022
University of Western Ontario

PROFILE

Result-driven junior full-stack developer with practical experience in front-end and back-end technologies, adept in JavaScript, Python, and C. Proven ability to contribute to development projects by delivering reliable and efficient code solutions, while continuously staying updated with the latest industry trends. Strong problem-solving aptitude, attention to detail, and excellent communication skills that promote effective collaboration and successful project outcomes.

EXPERIENCE

Software Developer

July 2022 - Present

- Developed automated test software using C and Bash Scripts to perform qualification testing on a vehicle management computer / network switch hybrid device
- Collaborated with hardware engineers to optimize system performance and reliability
- Created and maintained software documentation, including design specifications, code documentation, and user manuals
- Participated in code reviews and worked with other developers to ensure software quality and adherence to coding standards

Minor Projects Team Lead

July 2020 – July 2021

- Assisted senior project managers with capital project (>$200k), including coordination with internal stakeholder and EPC contractors to ensure project success
- Exposure to industrial operations, complex system processes, and practical failure modes
- Worked with a multidisciplinary team of engineers and technicians to support modifications
- Exposure to technical work done in both mechanical and electrical modifications
